SafetyLink®
Innovative
Fall Protection

SafetyLink's Classic Surface Mounted Plate is manufactured from marine grade aluminum, the light weight design has been developed to fit a multitude of profiles. Our plate fits directly to the top of the roof sheet, ensuring water passes through the pan.

SafetyLink's Static Line Shuttle and Intermediate T-Bolts have been designed as the ultimate pass through system, allowing the shuttle to glide freely over the forged Intermediate T-Bolts.

- 🔗 Patented design.
- 🔗 Solid 316 stainless steel components.
- 🔗 Quick connect shuttle.
- 🔗 Smooth transition over intermediates.
- 🔗 Forged tapered design enabling energy absorption.

Benefits of choosing SafetyLink:

SafetyLink's Classic Plate is multi-directional, attaching to the top of the profile on the roof sheeting for superior waterproofing. The system has less components, allowing for an easier install with comprehensive installation guides.

The Classic Surface Mounted Plate is made from marine grade aluminum and the Classic Corner Unit can be manufactured to suit any degree.

The Intermediate T-Bolt and Classic End Unit is forged from 316 Stainless Steel with energy absorbing qualities.

'Sleek design with maximum effectiveness'

SafetyLink's Single End Anchor was developed to cope with the weight of the cable while being able to absorb energy in the event of a fall.

SafetyLink will provide you with the following:

- 🔗 All products tested and manufactured to Australian and New Zealand Standards.
- 🔗 All distributors and installers are trained to use SafetyLink products.
- 🔗 Supply installation guides, testing results and product sheets.
- 🔗 Use a qualified and reputable testing authority.
- 🔗 Supply a large range of roof anchors that protect you from the ground up, allowing complete access to your roof.
- 🔗 Installers are qualified to do yearly inspections on your anchors as per Australian and New Zealand Standards.
