

Advance™

The Revolutionary Patented SurfaceLink

The right anchors for the job....

- Advance™ plate is multi directional, attaching to the top of the profile on the roof sheeting for superior waterproofing.
- Advance™ plate is made from marine grade aluminium and is a light weight design using only one plate.
- SafetyLink™ Eyebolt is forged from 316 Stainless Steel with powerful energy absorbing qualities.
- The SafetyLink™ eyebolt was extensively to maximize energy retaining its strength when arresting design enables it to bend like a fishing back on the structure and the person developed and tested absorption while a fall. Its tapered pole to reduce the load attached to the anchor.
- The SafetyLink™ Advance™ StaticLine tapered principle to ensure intermediates have the absorbing capabilities. System uses the same all end anchors and same energy
